Dear Sirs,

Sub.: Suzlon Group signs contract with Mitsui & Co for 106 MW wind farm in Australia.

Enclosed please find the copy of the press release in the subject matter.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

H.A. Kanuga
Hemal A. Kanuga,
Company Secretary.

Encl: As above.

28th November, 2013

Suzlon Group signs contract with Mitsui & Co for 106 MW windfarm in Australia

- Bald Hills wind project to be supplied with 52 MM92 turbines
- REpower's largest EPC contract in Australia to date
- Project scheduled for delivery in Q2 2014

Melbourne/Hamburg/Pune: Suzlon Group-subsiary REpower Systems SE announced the conclusion of an Engineering, Procurement and Construction (EPC) contract with Mitsui & Co (Australia) Ltd. to deliver 52 wind turbines with a total rated output of 106.6 megawatt (MW) for the Bald Hills windfarm in Victoria, Australia.

The contract is combined with a service contract for the next 10 years, with a further five year option. It is the first contract for REpower with Mitsui & Co, and marks the largest EPC contract, commonly referred to as a full-turnkey contract, for REpower in Australia to date.

Speaking on the order, **Andreas Nauen, CEO – REpower Systems SE**, said: "This contract is a milestone for our business in Australia. After a considerable effort of planning, we now look forward to delivering the Bald Hills Wind Farm in collaboration with Mitsui. We appreciate the trust they have in REpower and our technology and look forward to a long-term collaboration."

The turbines are to be delivered in Q2 2014 and to be commissioned in Q2 2015. They are expected to produce up to 380,000MWh of electricity per year, enough to power over 62,000 homes.

The REpower MM92 turbines, each with a rated power of 2.05MW, a hub height of 80 metres and a rotor diameter of 92.5 metres, are destined for the Bald Hills windfarm near Tarwin Lower, two hours from Melbourne in South Gippsland, Victoria.

Notes to the editor:

- REpower announced on 31st October, 2013 that it will change its name in 2014, and thereafter be called Senvion. The 'REpower' name was used under licence since 2001 from a Swiss corporation.

About REpower:

REpower Systems SE, a wholly owned subsidiary within the Suzlon group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 metres to 152 metres. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal, India and China. With more than 3,300 employees worldwide the company headquartered in Hamburg can make use of the experience gained from the manufacture and installation of over 5,000 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Romania, Sweden, Poland and Spain as well as on a global level in the USA, China, Australia and Canada.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2012. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with approximately 22,000 MW of wind energy capacity installed, operations across 32 countries and a workforce of over 10,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
