Strategic report

The directors present their strategic report of the financial statements for the year ended 31 March 2018.

Principal activities and review of the business

The principal activity of the Company during the period was that of an investment holding company. The directors do not currently anticipate any change in the company's business or activities for the future.

Principal risks and uncertainties

The Company aims to deliver sustainable value by identifying and responding successfully to risks. Risk management is integrated into the process of planning and performance management at a group level. Monitoring and accountability for the management of these risks occur through quarterly performance reviews at a group level.

The company is exposed to financial risk through its financial assets and liabilities. The key financial risk is that the proceeds from financial assets are not sufficient to fund the obligations arising from liabilities as they fall due.

Key performance indicators

The Companies Act requires directors to disclose the company's Key Performance Indicators (KPI's). Given the nature of the Company the Directors believe the sole KPI to be the valuation of the Company's investments in subsidiaries. At the end of the year 2018, the company holds investments in AE Rotor Holding which were already fully impaired in the prior year.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists.
