Suzlon Group wins 39 MW order in Poland

Pune / Hamburg: Suzlon Group-subsiidiary, REpower Systems SE announced its largest order to-date in Poland with the 39 MW Nowy Staw project, near the city of Gdansk. The wind farm will be RWE Innogy's fourth in Poland.

The 19 REpower MM92 – 2.05 MW wind turbines will be built over an area of 15 square kilometres, and are scheduled for commissioning in early 2013. The project has the potential to generate enough power to meet the needs of more than 50,000 homes every year.

Speaking on the project, **Prof. Fritz Vahrenholt, CEO of RWE Innogy** said: "With Nowy Staw we are expanding our wind portfolio in Poland by almost 40 MW. This will bring us a great step closer to our goal of adding 50 MW of wind capacity in Poland every year until 2015. Our Polish wind pipeline is well filled. All in all, Innogy plans to have around 300 MW in operation in Poland by 2015."

Mr. Andreas Nauen, CEO of REpower Systems SE, commented: "With Nowy Staw we are implementing our largest project in Poland so far. The site in the north of the country with its average wind velocities is optimally suited to accommodate the REpower MM92 turbines. To date, we have installed more than 2,000 plants of the MM series all over the world. We are delighted that RWE Innogy has put its trust in our proven technology and has once again chosen REpower as supplier."

Electricity generation from renewable sources is currently supported via a system of renewable energy obligations and 'green certificates' in Poland. Electricity suppliers are obliged to offer a certain percentage of the energy fed into the grid from renewables, they can comply with this obligation by acquiring additional 'green certificates'.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2011. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 19,000 MW of wind energy capacity installed in 28 countries, operations across 32 countries and a workforce of over 13,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercial 6.15 MW offshore turbine – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
