This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

H. A. Kanuga

Hemal A. Kanuga,
Company Secretary.

Encl.: As above.

23 May 2012

Suzlon's 138 MW project for Cennergi amongst preferred bidders selected by South African Department of Energy

- Supply and EPC contract for 66 S97 Suzlon turbines
- Largest Project among the selected bids
- Cennergi is a joint venture by Exxaro and Tata Power

Pune/Durban: The Republic of South Africa's Minister for Energy, Dipuo Peters, announced her Department's selection of the 138 MW AmakhalaEmoyeni Phase 1 wind energy project to be carried out in Eastern Cape, by Suzlon Group, the world's fifth largest* wind turbine supplier. The project was submitted by Cennergi under the second window of the Request for Bids for the Independent Power Producers Programme .

Cennergi is an equal joint venture between South Africa's Exxaro Resources Limited ("Exxaro") and The Tata Power Company Limited ("Tata Power"), India's largest private power utility. Cennergi has chosen to use 66 of Suzlon's S97-2.1 MW turbines for the project. Suzlon will deliver the turbines under a full EPC (engineering, procurement and construction) agreement.

Speaking on the partnership, **Thomas Garner, Cennergi CEO** said: "We had presented a very high quality bid, tailor-made for the energy needs of the Republic of South Africa. Suzlon's vast experience in emerging markets and current standing in the energy sector in South Africa specifically, has been instrumental in securing this bid. We are very excited by this opportunity and are looking forward to building a very successful wind project."

Silas Zimu, CEO – Suzlon South Africa, added: "The selection of our turbines, once again, in the second window of the (RFP) process is testament to the quality of our products and services. This project is especially exciting as it shows how a South African Black empowered developer (Cennergi) partnered with a South African Black empowered manufacturer (Suzlon) can ensure that the Government's commitments on wind energy are realized. The project is the largest of the awarded wind projects during the bid."

"This is yet another opportunity to continue in our objective to provide clean and green energy, and also to create many jobs."

Project construction is expected to commence in the first quarter of 2013.

About Cennergi

Cennergi (Pty) Ltd., is a 50:50 joint venture between South African-based diversified resources company Exxaro Resources Limited (Exxaro) and The Tata Power Company Limited (Tata Power), of India, through its subsidiary Khopoli Investments Limited.

Cennergi is based in South Africa and will focus on the development, ownership, operation, maintenance, acquisition and management of electricity generation assets in South Africa, Botswana and Namibia. The initial project pipeline focuses on renewable energy projects in South Africa and Cennergi's strategy is to create a balanced portfolio of diverse generation assets.
