Dear Sirs,

Sub.: Suzlon Group wins two new UK orders.

Enclosed please find the copy of the press release in the subject matter.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

H-A. Kanuga

Hemal A. Kanuga,
Company Secretary.

Encl.: As above.

7th January 2013

Suzlon Group wins two new UK orders

Edinburgh / Pune: Suzlon Group's UK subsidiary, REpower UK, marked the new year with a running start, signing two new contracts of totaling 16.4 MW. The company will be supplying wind turbines for a new wind farm at Wear Point in Pembrokeshire, South Wales, as well as the Avonmouth wind farm in south west England.

Wear Point, jointly owned by infrastructure company John Laing and developer Infinergy, will consist of four MM82 turbines. Construction work at Wear Point will commence in summer 2013 and will be completed towards the end of the year.

Avonmouth Wind Farm, located at the Bristol sewage treatment works nearby, is being developed by Triodos Renewables Plc and GENeco – Wessex Water's waste-to-energy company – and will consist of four MM92 turbines. The four new turbines at Avonmouth are part of a wider strategy to increase renewable energy at Wessex Water's sewage treatment works. They will be part of a renewable energy mix of wind and anaerobic digestion which is already in operation at the site.

Construction at Avonmouth is due to start in the summer and will be completed in December 2013. Triodos Renewables plc are pleased to be constructing another wind farm on a brown field site as part of it's commitment to investing in renewables projects that have minimal impact on the surrounding environment

Wear Point and Avonmouth wind farms will have a rated output of 8.2MW each, enough to generate power for nearly 5,000 homes.

Rick Eggleston, Managing Director, REpower UK commented: "I am delighted to announce the closure of both of these contracts. 2012 was one of our most successful years to date with nearly 300 MW signed, and these two new contracts represent the perfect start to what we believe will be a very successful 2013. We are pleased to continue our relationship with Triodos Renewables Plc for their Avonmouth Wind Farm, as well as John Laing and Infinergy for the Weir Point development in South Wales – we look forward to building on these relationships through 2013 and beyond."

About REpower:

REpower Systems SE, a wholly owned subsidiary within the Suzlon group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 metres to 126 metres. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönnfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal, India and China. With more than 3,000 employees worldwide the company headquartered in Hamburg can make use of the experience gained from the manufacture and installation of over 3,800 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Rumania, Sweden, Poland and Spain as well as on a global level in the USA, China, Australia and Canada.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2011. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with installations of over 20,000 MW and operations across 32 countries and a workforce of approximately 13,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
