## **Suzlon Group wins 350 MW Canada order: largest REpower contract to date**

**Hamburg/Montreal:** Suzlon Group's subsidiary REpower Systems SE has signed a contract with EDF EN Canada Inc., a subsidiary of EDF Energies Nouvelles, for the delivery of 175 2 MW wind turbines of the REpower MM82 and MM92 type for a project in Quebec, Canada. With a total rated output of 350 MW the Rivière-du-Moulin wind farm will be the biggest project in the history of REpower.

The project, located in the unorganised territories (UT) of Lac Pikauba and of Lac-Ministuk, north of the City of Quebec, will be developed in two phases: Construction of the first 150 MW starts in 2013, commissioning is set for December 2014. The second phase of 200 MW is scheduled for commissioning in December 2015.

**Al Kurzenhauser, COO of EDF EN Canada,** says: "We recognise and appreciate our long-term partnership with REpower. Together our companies have commissioned 1,275 MW throughout North America."

**Andreas Nauen, Chief Executive Officer (CEO) of REpower Systems SE,** says: "This contract is a milestone for REpower as it is our biggest to date. We are looking forward to continuing our successful collaboration with EDF EN and we appreciate the trust they have in REpower and our technology."

**Helmut Herold, Managing Director of REpower's Canadian subsidiary REpower Systems Inc.,** adds: "The contract signature for Rivière-du-Moulin is another great success for REpower in Canada that greatly contributes to the local economy. Both parties agreed to an ambitious delivery date which in turn will help maintain existing and create additional jobs in the Quebec wind industry."

The contract is part of the framework agreement of up to 954 MW signed between EDF EN and REpower in 2009. In less than one year, REpower delivered, installed and commissioned a record of 190 REpower MM82 and MM92 turbines aggregating 380 MW in a special cold climate version for three EDF EN Canada wind farms: Massif du Sud, Phase 1 of Lac Alfred and Saint-Robert-Bellarmin. Two of them – Massif du Sud and Phase 1 of Lac Alfred – just recently went into commercial operation.

### **About REpower:**

REpower Systems SE, a wholly owned subsidiary within the Suzlon group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 meters to 126 meters. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal, India and China. With around 3,300 employees worldwide the company

headquartered in Hamburg can make use of the experience gained from the manufacture and installation of over 4,600 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Sweden, Poland, Romania and Spain as well as on a global level in the USA, China, Australia and Canada.

**About Suzlon Group:**

The Suzlon Group is ranked as the world's fifth largest\* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2011. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with installations of over 20,000 MW and operations across 32 countries and a workforce of approximately 13,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at [www.suzlon.com](http://www.suzlon.com)
