

Suzlon commissions India's largest wind turbine generator

Renewable solution provider Suzlon Group on Tuesday announced the installation and commissioning of its new product, S128, claiming it to be the largest wind turbine generator in India. The first prototype of S128 has been commissioned at the Sanganeri site in Tamil Nadu, the company said, adding that testing is underway with certification expected in third quarter of calendar year 2018. The firm said the S128 WTG was available in 2.6 Mw to 2.8 Mw variants and offers hub heights up to 140 metres. **PTI**
