

India's longest wind turbine blade

SUZLON GROUP on Wednesday said it has designed and manufactured the country's longest wind turbine blade at its Padubidri rotor blade unit. The advanced blade (SB 63) measures 63 metres in length and has been specifically developed for Suzlon's new S128 wind turbine family with a rotor diameter of 128 metres, 1.5 times taller than the India Gate monument in terms of height.
