

# Suzlon completes testing of turbine

New Delhi, February 8

The Suzlon Group on Monday announced the completion of the type testing and certification of its S111 turbine for 50 Hz and 60 Hz variants. "The testing was carried out by an accredited independent third-party testing agency, and the certification was awarded by T NORD," Suzlon said in a press release. The certification acknowledges conformity with standards and regulations for the design, testing and manufacturing of S111. It also meets the Indian Grid Regulations. The S111, belonging to the reliable and proven 2.1 MW family, has been designed to ensure highest safety while offering lowest lifecycle cost that helps drive down the cost of energy for customers, the company said.
