

Suzlon wins 1 GW wind turbine contract

The Suzlon Group on Monday announced that it has won 105 MW wind turbine orders from Greenko Group which has over 1 GW of operating assets. The project will be located in Andhra Pradesh and will be progressively commissioned by January 2017. "It is a clear indication of the traction in overseas independent power producers' engagement with sustainable renewable technologies like wind energy. The Indian government's thrust on renewables and its conducive policies have encouraged IPPs to foray in the renewable energy sector," Ishwar Mangal, CSO, Suzlon Group said.
