Suzlon Group wins 48 MW order in France

- Order for 24 units of REpower MM92 turbines
- Turbines will be supplied to four windfarms

Courbevoie / Pune: REpower Systems SE, a Suzlon Group-subsiary, signed a contract with Valorem for 24 wind turbines of type MM92 with 80 metres hub height and a rated power of 2 megawatt (MW) to be supplied to four windfarms located in French Picardie, Pays de la Loire and Burgundy regions. REpower will also provide the full maintenance of the windfarms for 10 years.

The Airaine wind farm, located in Picardie, with a total power output of 12 MW, will be inaugurated on 19th September.

Work at the Pays de Retz South windfarm, located in Loire Atlantique, began recently and the commissioning is planned for autumn of this year.

The 12 turbines intended for Venoy Bene and Courgis, located in Burgundy will be erected in the beginning of 2014 and the two wind farms will be commissioned in spring 2014.

The towers of the 24 turbines will be manufactured at the Francéole facility in the Burgundy region. Valorem's subsidiary, Valréa, coordinates civil works and electrical works. Civil works, electrical works and other services as transport are handled by French companies.

Jean-Yves Grandidier, President - Valorem said: "We are glad to renew the partnership with REpower. We already have 21 REpower turbines in operation in Western France and a good partnership is established within our companies."

Olivier Perot, Managing Director – REpower S.A.S., added: "We are pleased Valorem is continuing the business partnership with REpower for these four contracts. This highlights the quality of our service and the reliability of our turbines. Moreover, REpower is proud to contribute to the creation of activities and jobs for wind sector in France through our long-term industrial partners such as Francéole."

With a total output of 48 MW, the four wind farms will cover the electricity needs of approximately 48,500 people (including heating) and offset 32,000 tons of CO₂ emissions annually.

About REpower:

REpower Systems SE, a wholly owned subsidiary within the Suzlon Group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 metres to 126 metres. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the REpower TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven as well as Portugal, India and China. With more than 3,300 employees worldwide the company headquartered in Hamburg can make use of the experience gained from the manufacture and installation of over 4,600 wind turbines around the world. REpower is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Sweden, Poland and Spain as well as on a global level in the USA, China, Australia and Canada.

About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity and marketshare, at the end of 2012. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 22,500 MW of wind energy capacity installed, operations across over 30 countries and a workforce of over 11,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt onshore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
