Dear Sirs,

Sub.: Suzlon Group wins 39 MW repeat orders from BEL and GSFC.

Enclosed please find the copy of the press release in the subject matter.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

H.A.Kanuga

Hemal A.Kanuga,
Company Secretary.

Encl.: As above.

23rd November, 2012

Suzlon Group wins 39 MW repeat orders from BEL and GSFC

- Orders comprise of 19 units of Suzlon's S95 turbine
- Projects to be commissioned by end-FY13
- ~1 GW of capacity supplied to public sector organizations

Pune: Suzlon Group, the world's fifth leading* and India's largest wind turbine manufacturer has signed contracts for 39.9 MW projects with leading Public Sector Undertakings (PSUs). The projects comprise of 19 units of Suzlon's S95 – 2.1 MW wind turbines.

Gujarat State Fertilizers and Chemicals Ltd. (GSFC) has signed a contract for 29.4 MW with Suzlon. GSFC currently has an existing installed capacity of 123.40 MW operating in sites across Gujarat. The new order would take GSFC's total installed capacity to 152.80 MW. The project comprises of 14 units of Suzlon's S95 – 2.1 MW wind turbines. The project is set to be commissioned in the Kutch district of Gujarat by end-FY13.

Bharat Electronics Ltd. (BEL) has signed a contract for 10.5 MW project with Suzlon. BEL currently has an existing installed capacity of 3 MW supplied by Suzlon operating in Karnataka. The new order would take BEL's total portfolio to 13.5 MW. The project comprises of five units of Suzlon's S95 – 2.1 MW wind turbines. The project is set to be commissioned in the Davangere District of Karnataka by end-FY13.

Speaking on the order, **Mr Rohit Modi, CEO – India and emerging markets, Suzlon Energy Limited**, said: "Suzlon is pleased to once again partner with BEL and GSFC in driving forward their commitment to sustainable energy, and through this, contribute to the development of country's low carbon economy. India has immense wind potential; and the central and state PSUs are leading the wave of powering India through renewable energy for a greener tomorrow. Suzlon, with its end-to-end capabilities across the wind energy value chain, deep market experience and robust technology, is proud to partner with the PSUs in this growth."

The S9X product suite being supplied to BEL and GSFC is a proven workhorse in Suzlon's product portfolio and has received an enthusiastic response from the market globally, with an expanding order base of over 1.4 GW. The S9X suite, which features larger rotor diameters, increased hub heights and technology enhancements, like the doubly fed induction generator (DFIG) technology, is designed to harness power efficiently from lower wind speed sites making the projects economically viable, and through this further expanding the wind market.
