Suzlon Group wins 150 MW order in Oklahoma, USA

- 73 MM92 wind turbines with Hot Climate Option
- Delivery and installation scheduled for the second half of CY2012

Pune / Hamburg: Suzlon Group subsidiary, REpower Systems SE, has concluded a contract with an East Coast US wind power developer for the delivery of 73 wind turbines. The REpower MM92 turbines, with an overall power output of 150 megawatts (MW), are destined for a project in Oklahoma, located in the south-central region of the United States.

The wind turbines each have a rated output of 2.05 MW, a rotor diameter of 92 metres and a hub height of 80 metres. Due to the climatic conditions the turbines are equipped with the Hot Climate Option, which eases operation during the dry, hot summer months in that region of the country. The delivery and initial operation of the turbines is planned for the third and fourth quarters of CY2012 (Q2, Q3 FY13).

Andreas Nauen, Chief Executive Officer – REpower Systems SE said: "We are pleased to announce our second largest US project to date and supply the reliable MM92 turbines for what will be REpower's first wind farm located in the south-central region of the country."

Tulsi Tanti, Chairman – Suzlon Group, added: "This order once again underscores our strong competitive positioning as a Group in the US market. With our comprehensive product portfolio, extensive service capabilities and a robust track record, we are well positioned to grab opportunities in the high growth expected in the US market in 2012."

**About Suzlon Group:**

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity, at the end of 2010. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 18,000 MW of wind energy capacity installed in 28 countries, operations in 32 countries, a workforce of over 13,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt on-shore turbines at 600 Kilowatts (KW), to the world's largest commercial 6.15 MW offshore turbine – built on a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
