For Immediate Release

Suzlon Secures 630 MW Order with Edison Mission Group of California

Order makes EMG Suzlon's biggest customer; will raise EMG's total Suzlon turbine capacity to over 1000 MW

Chicago\Pune: Suzlon Wind Energy Corporation, the US-based subsidiary of Suzlon Energy A/S of Denmark, has signed a contract to supply a total of 300 units of the S88-2.1 MW turbine, which is equivalent to 630 MW of capacity, with Edison Mission Group (EMG) of Irvine, California.

The two-phase contract calls for delivery of 315 MW of turbine capacity in 2008 and another 315 MW of capacity in 2009, which along with previous purchases brings EMG's total committed Suzlon turbine capacity to over 1,000 MW and makes it Suzlon's biggest customer. This is also the single largest order in Suzlon's history.

"This repeat order brings EMG's total committed capacity to a Suzlon company record of 1,000 megawatts," said Andris Cukurs, CEO of Suzlon Wind Energy Corporation, based in Chicago, Illinois. "Suzlon is honored to say that EMG has become our biggest customer to date."

"Suzlon has quickly become a major player in the U.S. market and it is largely due to the renewed commitment we've received from EMG since 2003. We are very proud of the relationship we have built with EMG," said Andre Horbach, CEO of Suzlon Group, from Suzlon's global management headquarters based in Amsterdam, The Netherlands.

The agreement includes a five-year contract for service and warranty in 2008. The turbines will be sited at various wind farm locations across the United States, which are yet to be announced.

About Suzlon Group

Suzlon is one of the pioneers in the wind energy industry. The company has come to the fore of the business by strategically focusing on innovation and research, an integrated value chain, and entering into emerging and high growth markets to drive sustainable growth.

Given the truly global nature of its business, Suzlon has established a Group management center in Amsterdam, Netherlands, and manages its overseas marketing effort out of Aarhus, Denmark, while runs its India operations out of Pune, India. The company's global spread reflects in its projects portfolio - extending across Australia, Brazil, China, India, Italy, Portugal, South Korea and the United States.

Suzlon's R&D effort also leverages this reach, in a highly successful practice of leveraging skill and knowledge pools in the industry and allied areas the world over. This has resulted in a research and development network located across geographies known for their leadership in the field - Suzlon today drives component R&D from Belgium, turbine development from India and Germany, and aerodynamics

research in the Netherlands. Suzlon matches innovation with quality, with systems certified by Det Norske Veritas (DNV) to ISO 9001:2000 standards.

Suzlon is one of the most integrated wind turbine manufacturers – with manufacturing capacity ranging from components to complete wind turbine systems, the entire value chain. The company has established manufacturing facilities around the world, to support the global spread of its operations. Suzlon today has manufacturing facilities in Belgium, China, India and the United States – covering the entire value chain from wind turbine components to complete wind turbine systems. Suzlon has a combined manufacturing base of 2,700 MW of annual capacity, and is undertaking an aggressive expansion program to expand its base to 4,200 MW of capacity by end of FY08.

The success of the company's strategy is seen in its growing market share, repeat orders, and breakthroughs into new markets. Suzlon ranked as the world's fifth leading wind turbine manufacturer with over 7.7% of global market share in 2006. The company has ranked as the leading manufacturer in the Indian market for nine consecutive years, maintaining over 50% market share.

Suzlon's true strength is seen not only in its technology, quality and market share – but also its people. The company boasts one of the largest teams in the wind energy business, totaling over 10,000 people from over a dozen nationalities in operations around the world. Suzlon in its vision for future growth aims to rank among the top three wind turbine manufacturers worldwide, maximizing growth while maintaining margins for the benefit of all stakeholders.
