23rd September 2016

Suzlon announces order wins totalling to 111.30 MW from Corporate and SME customers

- Installation of 53 units of S9X and S11X series Wind Turbine Generators (WTG) with rated capacity of 2.1 MW each
- Operation and Maintenance service offerings for an initial period of 10 years
- Over 90% repeat orders from mixed bag of Corporate and SME customers
- Projects to be executed in the states of Andhra Pradesh, Gujarat, Karnataka and Tamil Nadu

Pune, India: Suzlon Group, one of the leading renewable energy solutions providers in the world, today announced that it has been awarded orders for a combined capacity of 111.30 MW between August to September 2016. This combined capacity includes orders from reputed corporate houses such as Serum Institute of India Ltd, Rajasthan Gum Group, and an assortment of SME customers

The Corporate and SME orders have been received from mixed bag of customers across diverse industry segments including Chemical, Infrastructure, Manufacturing, Textiles, Power, Entertainment, Food & Agro, Handicrafts, Logistics, Trading and Pharma. These orders include Suzlon's latest product offerings the S111 90m tubular tower and S97 120m hybrid tower and also the time-tested S97 90m and S95 90m tubular tower models all with a rated capacity of 2.1 MW each.

Suzlon will provide the entire spectrum of turnkey solutions right from equipment supply till commissioning and also offer dedicated life cycle asset management services for a contractually defined period to these customers. The projects are spread across the key windy states of Andhra Pradesh, Gujarat, Karnataka and Tamil Nadu, and are scheduled to be completed by March 2017.

J.P.Chalasani, Group CEO, Suzlon Group said, *"We are happy to be associated with our existing customers time and again and further strengthening our partnership with them. It is encouraging as these orders continue to add a fillip to our robust order book and this is good investment by SME to support Make in India initiative. We are committed towards adding value to the energy security of our country and we continue to leverage our technological expertise which enables a product suite suitable to varying wind regimes and develop high yield products that effectively bring down the cost of energy."*

The innovative S9X and S11X series product portfolio is designed to optimally harness the available wind resources and deliver higher energy and return on investment (ROI) to customers. These product series feature the time tested Doubly Fed Induction Generator (DFIG) technology which is designed to maximise energy yield and unlock the potential of low wind sites.

The S97 120m is one of the tallest all-steel hybrid tower (120 meter height) in the world and combines both lattice and tubular structures. The S97 120m prototype, set up in November 2014, at Kutch, Gujarat, achieved a plant load factor (PLF) of 35% over the first 12 months of operation. The S111 90m features a rotor diameter of 111.8 meters with a swept area of more than 9500 square meters, making it one of the highest yielding wind turbines in its class. The S111 90m proto type was successfully commissioned in Tamil Nadu. The 2.1 MW rated capacity product platform is the most proven fleet

with ~8 GW commissioned, having crossed a cumulative of 100 million operating hours.

About Suzlon Group:

The Suzlon Group is one of the leading renewable energy solutions providers in the world with an international presence across 19 countries in Asia, Australia, Europe, Africa and North and South America. With over two decades of operational track record, the Group has a cumulative installation of approximately 15.5 GW of wind energy capacity, over 8,000 employees with diverse nationalities and world-class manufacturing facilities. Suzlon is the only Indian wind energy company with a large in-house Research and Development (R&D) set-up in Germany, the Netherlands, Denmark and India. Approximately 9.50 GW of the Group's installation is in India, which makes up for ~36% of the country's wind installations, making Suzlon the largest player in this sector. The company has recently forayed into the solar space. The Group, headquartered at Suzlon One Earth in Pune, India, is comprised of Suzlon Energy Limited and its subsidiaries.
