#### 3 NOTES TO THE STATEMENTS

#### **Activities**

The activities of SE Blades Technology BV, with registered office in Hengelo (O), mainly consist of the exploitation and development of durable windenergy

#### **Group structure**

SE Blades Technology BV is a member of the AE Rotor Holding BV group. The ultimate parent company of this group is Suzlon Energy Limited in Pune (India).

### Registered office

SE Blades Technology BV has its registered office at Jan Tinbergenstraat 290, 7559 ST, Hengelo (Ov).

## GENERAL ACCOUNTING PRINCIPLES FOR THE PREPARATION OF THEANNUAL ACCOUNTS

The annual accounts have been prepared in accordance with Title 9 Book 2 of the Dutch Civil Code and the firm pronouncements in the Guidelines for Annual Reporting in the Netherlands as issued by the Dutch Accounting Standards Board.

The annual accounts have been prepared based on the historical cost. Valuation of assets and liabilities and determination of the result takes place under the historical cost convention.

### Assumption of continuity

SE Blades Technology (SBT), as cost center, entirely depends on the financial development of Suzlon Energy Limited (SEL), the 5th largest wind turbine company in the world (based on installed capacity). The overall situation of the wind industry with worldwide overcapacity and a downturn in market demand starting early 2013, together with the financial burden from the earlier purchase of Repower by SEL, has adversely influenced the financial situation of SEL.

In this context, it is of key importance that SEL has been accepted in the CDR (Capital Debt Restructuring) program starting in October 2012 and became in full effective during the financial year 2013/14. This CDR is a model of the Indian National Central Bank for the promotion of Indian economy. The objective of this program is to support private India companies with a long term development potential by restructuring of financial obligations, i.e. through temporary suspending of interest and capital payments. Important to note is that only companies with a long term positive business perspective will be accepted in this program.

Simultaneously with this CDR program, SEL also initiated an overall internal restructuring and cost reduction program in its entities, with the target to reduce fixed and operating cost and staff until end of FY2013-14. Also SBT has to meet their defined targets and has finalized the restructuring and cost reduction efforts in FY2013-14 even below what was demanded.

In view of all circumstances, the accounting policies used in these financial statements are based on the expectation that the Company will be able to continue as a going concern.

#### Movement of accounting policies

Due to changed insights the work in progress is now reclassified as revenues to be invoiced. This change has no consequences on the equity or profit and loss.

#### **Estimates**

The preparation of financial statements in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. If necessary for the purposes of providing the view required under Section 362(1), Book 2, of the Dutch Civil Code, the nature of these estimates and judgments, including the related assumptions, is disclosed in the notes to the financial statement items in question.

### Comparitive figures

For the sake of an improved understanding of the figures in the balance sheet and profit and loss, some accounts have been reclassified. The comparitive figures have been adjusted accordingly.

The accounting policies are consistent with those used in the previous year.

## Conversion of foreign currency

Receivables, liabilities and obligations denominated in foreign currency are translated at the exchange rates prevailing at balance sheet date. The exchange differences resulting from the conversion as of balance sheet date, taking into account possible hedge transactions, are recorded in the profit and loss account.

Receivables, liabilities and obligations denominated in foreign currency are translated at the exchange rates prevailing at balance sheet date. Transactions in foreign currency during the financial year are recognised in the annual account at the exchange rates prevailing at transaction date. The exchange differences resulting from the conversion as of balance sheet date, taking into account possible hedge transactions, are recorded in the profit and loss account.

Foreign group companies and non-consolidated participating interests outside the Netherlands qualify as carrying on of business operations in a foreign country, with a functional currency different from that of the company. For the conversion of the annual account of these foreign entities the balance sheet items are translated at the exchange rate at balance sheet date and the profit and loss account items at the exchange rate rate at transaction date. The conversion differences that arise are directly deducted from or added to group equity.

### PRINCIPLES OF VALUATION OF ASSETS AND LIABILITIES

### Tangible fixed assets

Tangible fixed assets are presented at acquisition price less cumulative depreciation and, if applicable, less impairments in value. Depreciation is based on the estimated useful life and calculated as a fixed percentage of cost, taking into account any residual value. Depreciation is provided from the date an asset comes into use.

### **Inventories**

Inventories of raw materials, consumables and goods for resale are valued at acquisition price or lower nett realizable value. The lower nett income value is determined by the individual assessment of the inventories.

#### Receivables and deferred assets

Upon initial recognition the receivables on and loans to participations and other receivables are valued at fair value and then valued at amortised cost, which equals the face value, after deduction of any provisions. The fair value and amortised cost equal the face value. Any provisions for the risk of doubtful debts are deducted. These provisions are determined based on individual assessment of the receivables.

### Cash and cash equivalents

The cash is valued at face value. If cash equivalents are not freely disposable, then this has been taken into account in the valuation.

#### Other assets and liabilities

Liabilities are valued at nominal value, unless determined differently.

#### PRINCIPLES FOR THE DETERMINATION OF THE RESULT

#### General

The result is defined as the difference between the revenue from goods delivered and services performed on one hand and, on the other hand, the costs and expenses for that year, valued at historical costs.

#### Nett turnover

The nett turnover consists of revenue from the sale of goods and services during the reporting period after deducting discounts, rebates and value added taxes.

Income from the sale of goods is accounted when the significant risks and rewards of ownership have been transferred to the buyer. The cost of these goods is accounted in the same period.

The income for services is included proportionally to the level in which the services were performed based on the costs for the service up to the balance sheet date in relation to the estimated costs for all services to be provided. The costs for these services are accounted for in the same period.

### **Pensions**

SE Blades Technology BV has applied the liability method for pension plans. The premiums payable for the financial year are charged to the result.

### Amortisation and depreciation

The depreciation of the intangible fixed assets is calculated using fixed percentages of the purchase price or the research and development costs.

The depreciation on tangible fixed assets is calculated by using a fixed rate on the acquisition cost based on the expected life cycle. Financial profit and losses on disposal of tangible fixed assets are recorded under amortisation/depreciation, profit only to the extent that the profit is not deducted from replacement investments.

## **Operating costs**

Costs are recognised based on the historical cost convention and are allocated to the reporting year to which they relate.

#### Financial income and expenses

Financial income and expenses comprise interest income and expenses for loans (issued and received) during the current reporting period.

#### **Taxes**

In accordance with the Guidelines for Annual Reporting SE Blades Technology BV and AE Rotor Holding BV agreed the following. It should be taken into account that SE Blades Technology BV en AE Rotor Holding BV form a tax entity for corporate income tax. The Guidelines give several opportunities about the processing of corporate income tax between mother en daughter. SE Blades Technology BV ans AE Rotor Holding BV agreed that AE Rotor Holding BV (mother) will carry the total tax charge.

In this context SE Blades Technology will not process corporate income tax in the financial statements.

|   |           |           |

In accordance with the Guidelines for Annual Reporting SE Blades Technology BV and AE Rotor Holding BV agreed the following. It should be taken into account that SE Blades Technology BV and AE Rotor Holding BV form a tax entity for corporate income tax. The Guidelines give several opportunities about the processing of corporate income tax between mother en daughter. SE Blades Technology BV ans AE Rotor Holding BV agreed that AE Rotor Holding BV (mother) will carry the total tax charge.

In this context SE Blades Technology will not process corporate income tax in the financial statements.

Therefore the processed tax charge in de financial statements 2012/2013 at the amount of € 375.033 is corrected in the equity in 2013/2014. It should be taken into account that the comparitive figures should be adjusted for this amount (result and capital) to make a fair comparison.
